ELIMINATION OF COMMODITY DETAIL ON EXPORTS VALUED FROM \$50 TO \$99

Beginning January, 1963, in order to increase the speed at which statistical clerks could process the customs entries from which export statistics are derived and to bring uniformity in coding both export and import entries, it was felt desirable to follow for exports the same procedure adopted in coding import entries which began with statistics for April, 1962, (refer to blue pages of Imports by Commodities, April, 1962, Catalogue No. 65-007).

Studies made for the months of April, July, October and December, 1962, indicated that some 8% of the statistical components which required separate coding and tabulation involved values of between \$50 and \$99, and that these accounted in total for less than 0.2% of the value of exports. It was therefore decided to suspend the coding by commodity of values in this range; these are still included in country totals and grand totals, but this requires less than half the work formerly necessary to process these components.

Although components valued between \$50 and \$99 accounted for less than 0.2% of the total value of Canadian exports, their importance is much greater in the case of particular commodities. It is estimated that of the 1,050 classes included in sections 1 to 6 of the Export Commodity Classification there are 42 commodity classes with annual exports of \$100,000 or more to which components valued between \$50 and \$99 contributed at least 5% of total value, and 11 of these classes to which components in this range contributed at least 10% of class totals (see Tables 2 and 3 of this insert). A considerable number of commodity classes with annual totals of less than \$100,000 also obtained a significant proportion of their value from components valued between \$50 and \$99; in general, small value components tend to be more important in small classes than in large classes.

Effective with statistics for January, 1963, small value components are coded using the following procedure:

- (1) Entries with a total value of less than \$100.00 are included by country of consignment in class 970-75, except identifiable tourist purchases which are coded to class 995-14.
- (2) For multiple entries with a total value of \$100.00 or more, all components valued at \$50.00 or more are coded to their proper class while the residual is included in class 970-75.

Table 1. VALUE OF \$50-\$99 COMPONENTS, BY SECTIONS, AND PROPORTION CONTRIBUTED TO SECTION TOTALS AND TOTAL EXPORTS

NOTE: Values in this table are totals of the \$50-\$99 components in each section and in the six sections taken together (excluding section VII). Percentages show the proportions of each section and of the six sections taken together which were derived from \$50-\$99 components.

a - Importance of \$50-\$99 components varies irregularly.

b - Components valued from \$50-\$99 usually form a smaller proportion of total exports in months when total exports are large.

c - Total exports for this class usually small, except in 1961 when value was over \$100,000.

CHANGES IN COUNTRY AND EXPORT COMMODITY CLASSIFICATIONS EFFECTIVE JANUARY 1, 1963

1. CHANGES IN CLASSIFICATION OF COUNTRIES

Code	Country	Notes
I. <u>New Countries:</u>		
447	Cameroons	Until January 1, 1963, trade with the former French Cameroons was included with French Equatorial Africa.
486	Togo	From January 1, 1960, to December 31, 1962, trade with Togo was included with French West Africa.
II. <u>Changes in Country Designations:</u>		
449	Congo	Includes trade with Burundi and Rwanda.
454	French Equatorial Africa ...	Includes trade with the Republic of Central Africa, Chad and Congo-Brazzaville. Until January 1, 1963, included trade with the former French Cameroons.
556	Indonesia	Includes trade with the former Netherlands New Guinea. (Trade included with French and Netherlands Oceania from January 1, 1960, to December 31, 1962.)
654	French Oceania	Includes trade with the Marquesas Islands, New Caledonia, the New Hebrides, Rapa Island, the Society Islands and the Tubuai (Austral) Islands. From January 1, 1963, excludes trade with Netherlands New Guinea.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electricity where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold and current coin, which are shown in "Special Transactions - Non-Trade", but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunkersupplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January - March 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electricity reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electricity where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold and current coin, which are shown in "Special Transactions - Non-Trade", but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunkersupplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January - March 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electricity reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electricity where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold and current coin, which are shown in "Special Transactions - Non-Trade", but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunkersupplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January-March 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electricity reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
